

The impact you make

Switching on your fundraising helps the sickest kids get better, sooner – kids like Ollie.

Ollie had a life-saving heart transplant just after her first birthday. Her compromised immune system means she's often in isolation, and can't spend time with other kids.

But every dollar raised helps to bring play, fun and music to her bedside, and helps her feel safe and supported on her toughest days.

Here's how your fundraising can help

\$189

can help fund a music therapy session to help sick kids on their road to recovery to help reduce pre-surgery anxiety and distress.

\$520

could help to train our volunteers with the skills needed to support families in times of stress.

\$1,000

could help purchase an iPad to help distract and entertain kids confined to their beds.

Your funds in action

You'll make hospital stays more fun

Your fundraiser will help buy puzzles, games and books that bring smiles to sick and injured kids during tough times.

You'll bring music to bedsides

The money you raise can bring music to sick kids, helping make their hospital stay better, so they can get back to being kids.

You'll share special milestones

The funds you raise will help buy gifts for children who are spending a birthday or Christmas in hospital, and bring joy to their day.

You'll make memories for life

The donations you collect will help bring petting zoos, workshops, special guests and magical experiences to kids in hospital.

You'll fuel imaginations

Your fundraising will help fill the hospital's Kidzone with craft materials, colouring supplies and everything kids need to get creative.
